Subject: Installation of Slipper Tanks on #353 Contract SP-1915

Ref: SP-1915 Contract Approval No. 7 - Change Order No. 1 (Letter 21823)

Referenced contract approval letter gave authorization for manufacture of five (5) additional sets of slipper tanks to be shipped as kits only. It was specifically stated that installation of any of these tanks would be the subject of separate consideration.

We have been requested to install one set of these slipper tanks on article #353. The airplane has been returned to EAFB and the wings brought to Burbank for this purpose. Our cost estimate to accomplish this job is as follows:

Installation Labor:		\$4,342.00
(Includes clean-up of wings and pressure test and complete installation of tanks)		
Flight Test:		1,513.00
Truck Transport Wings to & from Burbank:		<u>248.00</u>
Total Cost		\$6,103.00
Profit 9.5%		<u>580.00</u>
Total Price		\$6,683.00

May we have your approval for this work.

In addition to the slipper installation we are incorporating some outstanding service bulletin kits and some general clean-up of the article and charging these costs to the SP-1915 basic flight test program.

Very truly yours,

Bob
